Do encharge storage systems provide backup power? Encharge storage systems are capable of providing backup power when an Enphase Enpower™ smart switch is installed at the site. For installing Encharge with 3rd party PV inverter please refer to the planning guide document on Enphase Energy Storage System for third party PV invert-ers online on Enphase website. What is an encharge storage system? The Encharge storage system senses when it is optimal to charge or discharge the battery so that energy is stored when it is abundant and used when scarce. Encharge storage systems are capable of providing backup power when an Enphase Enpower™ smart switch is installed at the site. How do I configure ESS in a diesel generator? Configuring ESS in a system which uses a diesel generator as backup - for extended mains failures - can be achieved. Grid code and Loss of Mains configuration will need special attention, see here. And on the GX device, select 'Generator' as the AC Input type in the Settings -> System setup menu. What is included in the encharge™ storage system? The Encharge™ storage system includes the Enphase Encharge Battery(ies) with integrated Enphase IQ™ Microinverters. The Enphase IQ Envoy™ communication gateway measures PV production and home energy consumption. How do I set up an ESS system? There are a few different ways to set an ESS system up. A combination of these are possible as well: See below drawings to get an idea of all possibilities. The first drawing shows the wiring when a MultiPlus-II is used; and the second one shows how it is wired with a MultiPlus or Quattro. What type of inverter/charger is used in the energy storage system? The Energy Storage system, uses a Multi or Quattro bidirectional inverter/charger as its main component. Note that ESS can only be installed on Multis and Quattros which feature the 2nd generation microprocessor (26 or 27). All new systems shipped have 2nd generation chips.
