

energy storage power eu product label image

What is a European energy label? The uniform Europe-wide energy label is language-neutral. In addition to pictograms indicating the energy efficiency class, it gives consumers information about annual energy consumption and other product specifics, for example, the water consumption and water-extraction efficiency of washing machines.

What is an energy label? The energy label has three main goals:

- Helping consumers select more energy-efficient products
- Encouraging manufacturers to use more efficient technology
- Providing energy consumption information and supplementary information about a product's relevant features

Do you know the EU energy label rules? As a manufacturer, importer, or reseller, you should know that EU energy label rules apply to household appliances (e.g. dishwashers, televisions, light bulbs, etc.) and business-to-business products (e.g. water heaters, air conditioners, boilers etc.).

What is energy labelling framework regulation? The Energy Labelling Framework Regulation establishes a framework for energy-related products and it requires: In turn, delegated acts supplement the regulation with product-specific requirements, such as labelling or the product information sheet contents.

Which products are covered? What does Article 1 of the energy labelling framework regulation mean? Article 1 of the Energy Labelling Framework Regulation states that it applies to energy-related products sold in the EU:

1. This Regulation lays down a framework that applies to energy-related products ('products') placed on the market or put into service.

Article 2 defines an "energy-related product" as follows:

What is the energy labelling scheme? The labelling scheme helps consumers make informed purchasing decisions while encouraging the production of more energy-efficient products. The current legal basis for the scheme is Regulation (EU) /, which provides the overarching framework for energy labelling in the EU.

Product List All the products covered by the Directive /125/EC and Regulation (EU) /. Information on energy savings, Energy Labelling and Ecodesign requirements can be found on ENERGY STORAGE POWER EU PRODUCT LABEL IMAGE

The EU energy label. The EU energy label is ??? together with minimum 'ecodesign' requirements ??? a success story that has been key in boosting the energy efficiency of EPREL
