Where can I find information on energy storage safety? For more information on energy storage safety, visit the Storage Safety Wiki Page. The BESS Failure Incident Database was initiated in as part of a wider suite of BESS safety research after the concentration of lithium ion BESS fires in South Korea and the Surprise, AZ, incident in the US. What are the different types of energy storage failure incidents? Stationary Energy Storage Failure Incidents - this table tracks utility-scale and commercial and industrial (C& I) failures. Other Storage Failure Incidents - this table tracks incidents that do not fit the criteria for the first table. This could include failures involving the manufacturing, transportation, storage, and recycling of energy storage. What happened at xerotech battery facility? Fire started in a shipping container used to store battery modules at Xerotech battery facility. Damaged batteries were isolated to prevent spread to other parts of facility. Crews have been using water to moderate overheating. Water is being recirculated to prevent runoff contamination. What happened at McMicken energy storage unit? This incident occurred at the Arizona Public Service (APS,) McMicken Energy Storage Unit facility in Surprise, Arizona, 28 miles northwest of Phoenix. As shown in Fig. 3, the facility is adjacent to an APS substation. It is a 2 MW, 2 MWh facility with 27 racks, each containing 392 Li-ion Nickel-Manganese-Cobalt pouch cells (DNV GL,).
