Why should you buy a portable power station? Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more. What is a portable power station? A solar generator is a portable power station that supports solar panel input. They are often used interchangeably, but not all power stations come with solar panels. How long does a portable power station last during an outage? Run time depends on capacity and load. How much does a portable power station weigh? Faster charging is especially useful if you're cycling power usage throughout the day or topping off before a storm hits. Not all portable power stations are truly "portable." Some weigh over 100 pounds, especially expandable or high-capacity systems. For RV trips or apartment use, a compact, under-50 lb model may be more manageable. Which portable power station should I buy? If you want a portable power station that's lighter than our upgrade pick, often costs less, and adds a small light, and you don't mind that it has less power, a single handle, and fewer outlets and charging ports: Get the Jackery Explorer 880. It weighs 21.8 pounds, and has an ergonomic handle on top and a small light built into the side. How long does a portable power station last? A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO₄ battery technology, which lasts far longer than older lithium-ion technology. How much more? LiFePO₄ power stations will last for more than 3,000 charge cycles, or about 10 years. What is the best portable power station for home backup? For those who need reliable power without the bulk, the Anker SOLIX C1000 delivers a surprising punch in a small package. It's easily one of the best lightweight portable power stations for home backup and is especially suited for apartments, travel trailers, or short-term outages.
