

local new energy group energy storage base factory is in operation

A new production base for energy storage and power batteries in Yanzhou district of Jining, Shandong province, recently went into operation, making it CATL's first in northern China and currently the largest battery base in the country in terms of planned capacity, according to a statement from the company. As of the end of August, CHN Energy has put into operation 167 new energy storage projects, with a total capacity of 6,568 MW / 14,798 MWh. Adhering to an innovation-driven development strategy, the Group has established a large-scale and diversified pattern in new energy storage development.

HOHHOT -- Inner Mongolia Energy Group has started constructing a large-scale new energy storage power station in the Ulan Buh Desert, the eighth-largest in China, to better harness new energy power for grid connection. Designed with a capacity of 605,000 kilowatts, the project is the largest single-unit energy storage battery manufacturing base funded by China's battery giant Contemporary Amperex Technology Co., Ltd. (CATL) in Guian New Area of southwest China's Guizhou Province. The first phase of the battery base, which covers an area of 60 acres, with a total investment of 850 million yuan. The first phase will be connected to the grid in April. This project is an important measure for Chenlong Group to implement the layout of new energy industries, promote the innovation-driven development.

A new production base for energy storage and power batteries in Yanzhou district of Jining, Shandong province, recently went into operation, making it CATL's first in northern China and currently the largest battery base in the country in terms of planned capacity, according to a statement from the company. According to public information, the Super Factory is EVE Energy's tenth facility in Jingmen and the largest single-unit energy storage factory in the industry. It primarily produces MB56 large LFP (lithium iron phosphate) energy storage batteries, with a total investment of RMB 10.8 billion and a capacity of 400MWh.

CHN Energy Commissions 167 New Energy Storage Projects

Ningdong Hybrid Photovoltaic Base commissioned the nation's largest grid-forming energy storage power station, featuring the country's first hybrid lithium battery + solar power generation system.

Chinese company builds new energy storage power station to Inner Mongolia Energy Group has started constructing a large-scale new energy storage power station in the Ulan Buh Desert, the eighth-largest in China, to better harness new energy power for grid connection.

CATL's Guizhou Battery Base Starts Operation

The first phase of a new energy power and energy storage battery manufacturing base in southwest China, funded by China's battery giant Contemporary Amperex Technology Co., Ltd. (CATL), started construction in Guian New Area of southwest China's Guizhou Province.

Chenlong New Energy's 200MW/400MWh centralized energy storage project On November 21, Chenlong Group held a groundbreaking ceremony for the "New Energy 200MW/400MWh Centralized Energy Storage Project" in Mudan District, Heze.

CATL's 1st battery base in northern China goes into operation

The battery production base is being built in three phases, with the first phase of 60 GWh already in operation. The second and third phases of the project will go into operation later this year and next year.

HiTHIUM Celebrates New Milestone in U.S.

The operation will create nearly 200 high-quality jobs and serve as a cornerstone of domestic energy storage production. The state-of-the-art manufacturing facility in Mesquite, Texas.
