

What is the New Energy Outlook?The New Energy Outlook presents BloombergNEF's long-term energy and climate scenarios for the transition to a low-carbon economy. Anchored in real-world sector and country transitions, it provides an independent set of credible scenarios covering electricity, industry, buildings and transport, and the key drivers shaping these sectors until .

What's new in BNEF's New Energy Outlook?For this edition of BNEF's New Energy Outlook, we have focused our efforts on updating the base-case Economic Transition Scenario (ETS), incorporating new analysis on data-center power demand, changed policy assumptions in some key geographies, and updated cost estimates for both clean and fossil energy.

What is the future of energy storage?Global installed energy storage is on a steep upward trajectory. From just under 0.5 terawatts (TW) in , total capacity is expected to rise ninefold to over 4 TW by , driven by battery energy storage systems (BESS). Last year saw a record-breaking 200 gigawatt-hours (GWh) of new BESS projects coming online, a growth rate of 80%.

What is BNEF's outlook for energy transition in the US?BNEF's outlook for energy transition in the US will evolve in the coming months as more policy clarity emerges from a fluid and fast-moving picture in Washington today. The updated US base case presented in this report incorporates a lowered EV forecast that assumes weaker fuel-economy standards and the removal of purchase tax credits.

What are the benefits of energy storage technologies?Renewable energy integration and decarbonization of world energy systems are made possible by the use of energy storage technologies. As a result, it provides significant benefits with regard to ancillary power services, quality, stability, and supply reliability.

What's new in the energy transition edition?The edition presents a new, updated base-case scenario and a deep dive into key trends affecting the energy transition in the next 10 years to support corporations, financial institutions and policymakers navigating the energy transition.

New Energy Outlook In conjunction with our Paris-aligned Net Zero Scenario (published last year), we hope that this new work can support companies, financial institutions and policy professionals in developing

New Energy Outlook The edition presents a new, updated base-case scenario and a deep dive into key trends affecting the energy transition in the next 10 years to support corporations, financial institutions and policymakers navigating the

BNEF New Energy Outlook WebinarsThis edition includes analysis on data-center power demand, changed policy assumptions in some key geographic areas, and updated cost estimates for both clean and fossil energy.

Energy Storage OutlookLast year saw a record-breaking 200 gigawatt-hours (GWh) of new BESS projects coming online, a growth rate of 80%. Access the whitepaper to get the Energy Storage

World Energy Outlook - Analysis About this report The IEA's flagship World Energy Outlook, published every year, is the most authoritative global source of energy analysis and projections. It identifies and explores the

New Energy Outlook: What Holds for Solar, Explore what holds for clean energy--from solar and wind growth to storage innovations and grid modernization. Key insights from FFI Solutions. Recent advancement in energy storage technologies and their Abstract

Renewable energy integration and decarbonization of world energy systems are made possible by the use of energy storage technologies. As a result, it provides

Global Energy Storage Growth

Upheld by New The global energy storage market is poised to hit new heights yet again in . Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to The Future of Energy Storage | MIT Energy Initiative Storage enables electricity systems to remain in balance despite variations in wind and solar availability, allowing for cost-effective deep decarbonization while maintaining reliability. The Future of Energy Storage report is an Renewable Energy Industry Outlook Deloitte's Renewable Energy Industry Outlook draws on insights from our power and utilities survey, along with analysis of industrial policy, tech capital, new technologies, workforce development, and carbon Global Energy Storage Growth Upheld by New The global energy storage market is poised to hit new heights yet again in . Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to Global energy storage market: review and outlook The global energy storage market added 175.4 GWh of installed capacity in , with the three major regional markets--China, the Americas, and Europe--continuing to World Energy Outlook With all these issues front of mind, energy security is again a major theme of this year's World Energy Outlook (WEO). In our fast-changing world, the concept of energy security goes well Energy Transition Investment Trends There was also strong growth in emerging areas, with investment in hydrogen tripling year-on-year, carbon capture and storage nearly doubling, and energy storage jumping 76%. China New Energy Outlook The New Energy Outlook (NEO) is BloombergNEF's annual long-term scenario analysis on the future of the energy economy. This year we have gone beyond our traditional focus on the BloombergNEF's Electric Vehicle Outlook Yayoi Sekine heads the Energy Storage practice at BloombergNEF based out of New York, overseeing a global research team that produces insights on energy storage markets, technologies and 2H Energy Storage Market Outlook The global energy storage market is set for another record year. BloombergNEF expects 69GW/169GWh of additions in , up 76% in gigawatt-hours from . China continues to lead installations thanks to BNEF New Energy Outlook Webinars The New Energy Outlook presents BloombergNEF's long-term energy and climate scenarios for the transition to a low-carbon economy. Anchored in real-world sector and country transitions, it New Energy Outlook Webinars | Bloomberg Professional Matthias Kimmel Head of Energy Economics BloombergNEF Matthias Kimmel is the head of Energy Economics at BloombergNEF. He leads the analysis for the New Energy New Energy Outlook For this year's New Energy Outlook, we have focused our efforts on updating the base-case Economic Transition Scenario (ETS), incorporating new analysis on data-center power Energy storage: 5 trends to watch in | Wood Mackenzie The scene is set for significant energy storage installation growth and technological advancements in . Outlook and analysis of emerging markets, cost and Energy Transition Investment Trends Executive summary Global investment in the energy transition hit a record \$2.1 trillion in , climbing 11% from a year earlier. Mainland China has returned to the driving seat, accounting New Energy Outlook Webinars | Bloomberg Professional Ian Berryman is the Lead Energy Systems Modeler at BloombergNEF. He heads the modeling for the New Energy Outlook, Bloomberg's annual long-

term analysis on the future New Energy Outlook For this year's New Energy Outlook, we have focused our efforts on updating the base-case Economic Transition Scenario (ETS), incorporating new analysis on data-center power Energy storage: 5 trends to watch in | Wood The scene is set for significant energy storage installation growth and technological advancements in . Outlook and analysis of emerging markets, cost and supply chain risk, storage demand growth New Energy Outlook Webinars | Bloomberg Ian Berryman is the Lead Energy Systems Modeler at BloombergNEF. He heads the modeling for the New Energy Outlook, Bloomberg's annual long-term analysis on the future of energy and New Energy Outlook | BloombergNEF The New Energy Outlook presents BloombergNEF's long-term energy and climate scenarios for the transition to a low-carbon economy. Anchored in real-world sector and country transitions, it provides an independent set of Global Energy Outlook : Peaks or Plateaus? New York Times, Wall Street Journal, and many more. He has presented his research for policymakers, industry, and other stakeholders around the United States and internationally, New Energy Outlook The New Energy Outlook (NEO) is BloombergNEF's latest global energy transition outlook to . Here, we present a new, updated base-case scenario, mapping out how the transition World Energy Outlook - Analysis This year's Outlook comes against a backdrop of escalating risks in the Middle East and heightened geopolitical tensions globally, and explores a range of energy security issues that decision makers face as they proceed Renewable Energy Industry Outlook Deloitte's Renewable Energy Industry Outlook draws on insights from our power and utilities survey, along with analysis of industrial policy, tech capital, new technologies, workforce development, and carbon New Energy Outlook This report is BloombergNEF's latest global energy transition outlook to . Here, we present a new, updated base-case scenario, mapping out how the transition might progress in a world World Energy Outlook The analysis in this year's Outlook reinforces my long-held conviction that energy security and climate action go hand-in-hand: the world does not need to choose between ensuring reliable US energy storage set a new record in Q1 but the future US energy storage set a Q1 record in with 2 GW added, but looming policy changes could put that growth at serious risk. World Energy Markets Outlook Welcome to the edition of the World Energy Markets Outlook (formerly Observatory). As the global energy landscape undergoes rapid and profound transformation, Capgemini is evolving Scaling the Residential Energy Storage Marketo Battery storage is an important enabler of the energy transition, and residential batteries are a major part of that (Figure 1). Already in Germany and Italy, over 70% of new home solar Global Energy Storage Growth Upheld by New The global energy storage market is poised to hit new heights yet again in . Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to New Energy Outlook Webinars | Bloomberg Professional Ian Berryman is the Lead Energy Systems Modeler at BloombergNEF. He heads the modeling for the New Energy Outlook, Bloomberg's annual long-term analysis on the future
