What is energy storage performance testing? Performance testing is a critical component of safe and reliable deployment of energy storage systems on the electric power grid. Specific performance tests can be applied to individual battery cells or to integrated energy storage systems. What is an energy storage system project certification? Assembly inspection of the Energy Storage System (optional phase). The Project Certification covers the application of several certified components for a specific Energy Storage System project and includes the following mandatory and optional phases: Do energy storage systems need certification? Energy storage systems require comprehensive certification across multiple dimensions to ensure safety, performance, environmental compliance, and effective battery management. Safety is the foremost consideration for energy storage systems, as they involve high-voltage components and energy-dense batteries. What is Energy Storage Performance Certification? Performance certification ensures that energy storage systems meet technical benchmarks for efficiency, longevity, and environmental adaptability. Relevant performance standards include: IEC/EN 62620: Performance criteria for lithium-ion batteries. IEC/EN 61427-1/-2: Requirements for secondary cells and batteries for renewable energy storage. Do energy storage systems need UL certification? For energy storage systems, UL standards provide comprehensive testing protocols for electrical safety, thermal performance, and hazard prevention. However, UL certification is not mandatory for European market entry. Relevant UL Standards for Energy Storage Systems: How do integrated system tests measure energy storage performance? Integrated system tests are applied uniformly across energy storage technologies to yield performance data. Duty-cycle testing can produce data on application-specific performance of energy storage systems. This chapter reviewed a range of duty-cycle tests intended to measure performance of energy storage supplying grid services.
